

## Hopper Barge

# Fenja R

The towed hopper barge Fenja R has been purpose-built for the transport of sand and silt.

Good solutions are always provided to suit the customers' requirements, with special emphasis on environmental challenges.

The barge can also be attached to our grab dredgers and serve as additional hopper capacity.

With a very shallow draught, the barge can be employed on all types of projects.

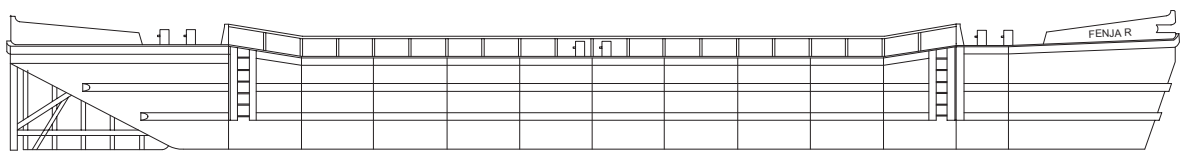

If the material is polluted, the barge can be sealed.

# Specifications

## Nordic mythology

**Fenja** and **Menja** were two ettin sisters and warrior women who had the power of prophecy, according to the old Norse poem "Grotta's Song". In old legends, they have been widely associated with their devotion to precious metals, hard labour, and how the ocean came to be full of salt.

## Hopper Barge

# Menja R

The towed hopper barge Menja R has been purpose-built for the transport of sand and silt.

Good solutions are always provided to suit the customers' requirements, with special emphasis on environmental challenges.

The barge can also be attached to our grab dredgers and serve as additional hopper capacity.

With a very shallow draught, the barge can be employed on all types of projects.

If the material is polluted, the barge can be sealed.
