

Tug Boat

Loke R

Loke R is a specialised tug designed for towing, pipe handling, and ploughing operations. The vessel is equipped with a removable 10-tonne hydraulic A-frame and a 20-tonne towing winch, providing flexibility for a wide range of offshore tasks.

The 20-tonne SWL knuckle boom crane is capable of handling most spare parts and assisting in operational support where required.

With its vertical rubber-covered push bow, Loke R can safely accommodate crew transfers, while the flybridge control system ensures excellent visibility and enables safe and precise manoeuvring.

With a bollard pull of 18 tonnes, Loke R is capable of supporting a wide range of marine operations.
